O B J E C T I V E

Seeking a software development role where I can utilize my experience in developing content management platforms, blog websites, application management systems, and email marketing systems from scratch. With a strong foundation in computer science and a passion for building software, I am confident that I can contribute to a team as a software developer.

E D U C A T I O N

Jul 2023

B.TECH - SBIT
Specialized in Computer Science Engineering with a 70% of Cumulative GPA. Relevant Coursework On Data Structures, Data Mining, Data Base Management Systems, and Web Technologies.

WEEKLY JOB BOARD – PERSONAL PROJECT

Dec 2022
As part of my coursework in web development, I participated in a group project to create a job board site. 75% of site job postings are for 2023 only and 25% are for 2019-2022.

Major accomplishments:
- My responsibilities included designing and implementing the front-end of the site using HTML, CSS, and JavaScript.
- This allowed me to get strong organizational skills and the ability to communicate effectively.

Dec 2022 **COLLEGE LIBRARY –** MINI PROJECT
As a part of my coursework, I completed a mini project to design a database for a college library.

Major accomplishments:
- Developed a user interface using a programming language such as Java or Python to allow library staff to search the database.
- This mini project allowed me to possess great collaboration skills with the ability to work cross-functionally.

S K I L L S

TECHNICAL SKILLS: Python, MySQL, HTML, CSS, JavaScript,
